Objective

Aspiring MERN Stack Developer and BCA student with a solid foundation in full-stack web development. Seeking an internship or entry-level role to build scalable, user-centric applications, apply problem-solving skills, and contribute to high-impact, real-world projects.

Education

- Goel Institute of Higher Studies, Lucknow** 2nd year
Bachelor of Computer Applications (BCA)
SGPA: 8.53
- BRDKIC, Deoria**
12th
Percentage: 67.2% |Year 2023

Skills

- Programming Languages: Java, JavaScript, Python
- Web Technologies: HTML5, CSS3, Responsive Design
- Database: SQL, MySQL
- Algorithms Tools: Git, GitHub, VS Code
- Core Concepts: OOPs, Data Structures,

Projects

- Smart Tourism System**
Developed a full-stack web application for managing travel listings and user reviews. Implemented user authentication and authorization using Passport.js (Signup/Login/Logout). Built complete CRUD functionality for listings and reviews with MongoDB and Mongoose. Designed RESTful APIs and followed MVC architecture for scalable code structure. Integrated session management and flash messages for enhanced user experience. Ensured data validation and error handling using Joi and custom middleware. Technologies: MongoDB, Express.js, Node.js, EJS, Bootstrap, Passport.js
- Weather App Application**
Developed a responsive weather application that displays real-time weather information for different cities. Integrated a weather API to fetch live data such as temperature, humidity, and weather conditions. Implemented asynchronous data fetching using JavaScript and the Fetch API. Used DOM manipulation to dynamically update weather details based on user input. Designed a clean and user-friendly interface using modern CSS. Technologies: HTML5, CSS3, JavaScript, Weather API
- Calculator Web Application**
Developed a fully functional web-based calculator with clean and responsive UI. Implemented arithmetic operations including addition, subtraction, multiplication, and division using JavaScript logic. Designed modern user interface using CSS with proper button alignment and layout structure. Handled user input validation and edge cases such as division by zero. Applied DOM manipulation and event handling for real-time calculation. Technologies: HTML5, CSS3, JavaScript

Achievements & Awards

- Secured 2nd Position in College-Level Debugging Competition. Maintained consistent SGPA of 8.53. Built multiple frontend and Java-based projects.

Interests

- Web Development and UI Design, Building Interactive Web Projects, Learning New Programming Technologies, Problem Solving and Logical Thinking Exploring Open-Source Projects on GitHub

Activities

- Actively building mini and major projects in Web Development using HTML, CSS, and JavaScript.
- Regularly practicing coding problems to improve logic building and problem-solving skills.
- Participating in college-level technical events and coding activities.
